Autograder	
Asserts	1.1) Test get_answers on data_lecture (2/2) 1.2) Test get_mode (3/3) 1.3) Test get_stats (3/3)
Lecture Data	2.1) Lecture data with 10 folds and 0 depth limit should be majority class predictor (5/5) 2.2) Lecture data with 10 folds and None depth limit should completely learn tree (5/5) 2.3) Test cross_validate() on lecture data with 10 folds and increasing depth limits (10/10)
Mushroom Data	3.1) Mushroom data with 10 folds and 0 depth limit should be majority class predictor (5/5) 3.2) Mushroom data with 10 folds and None depth limit should completely learn tree (5/5) 3.3) Test cross_validate() on mushroom data with 10 folds and increasing depth limits (20/20)
AI/ML Implementation	
Tree	**+ 20 pts** Used AI/ML Library to Create Tree
Optimization	**+ 22 pts** Used AI/ML Library to create Random Forest or Boosted Tree
Instructions	
	– 5 pts Ignored instructions: Kernel -> Restart & Run All **– 5 pts** Ignored instructions: Docstrings applied to all functions (helper and main) **– 5 pts** Ignored instructions: Earnest *attempt* to keep functions <= 20 lines
